tesa 4965

Double-coated Tape with High Shear and Temperature Resistance

Product Description/ Application:

tesa 4965 is a transparent, double sided, self-adhesive tape consisting of a PET film backing and a modified acrylic adhesive

tesa 4965 features esp.

- reliable bond even to Low Surface Energy substrates
- immediate usability right after assembly
- suitability for most demanding applications such as heavy stress, high temperatures or critical substrates

tesa 4965 is used for applications like

- Mounting of ABS plastic parts in the car industry
- Self-adhesive mounting of rubber/EPDM profiles
- Mounting of decorative profiles and mouldings in the furniture industry
- Mounting of battery packs, lenses and touchscreens in electronic devices

Product Design:

Backing	Adhesive	Thickness*	Colour
PET	modified acrylic	205 µm	transparent

Liner:

Colour	Type	Thickness*	Weight*
Red (PV0)	MOPP film	80 µm	72 g/m ²
Brown (PV1)	glassine paper	71 µm	83 g/m ²
White (PV4)	PE-coated paper	118 µm	120 g/m ²

tesa self-adhesive tapes are used successfully in many sectors to solve a variety of problems. Our publications contain numerous examples of such uses, intended to help towards a solution of your particular problems. Each tesa product has been developed for a particular range of applications. Nevertheless, experience has shown that even for one and the same objective, the exact requirements may differ from case to case. We, therefore, recommend that you carry out your own tests in each case, to confirm that the tesa self-adhesive tape which you envisage using is appropriate for your particular application. The Advisory Section of our Technical Service Department will be happy to assist. All information and recommendations are given by us in good faith, on the basis of practical experience, but without warranty.
